Newcomer Nancy just moved to town and is looking to learn and explore the new area. She accesses the application and is greeted by the home screen.
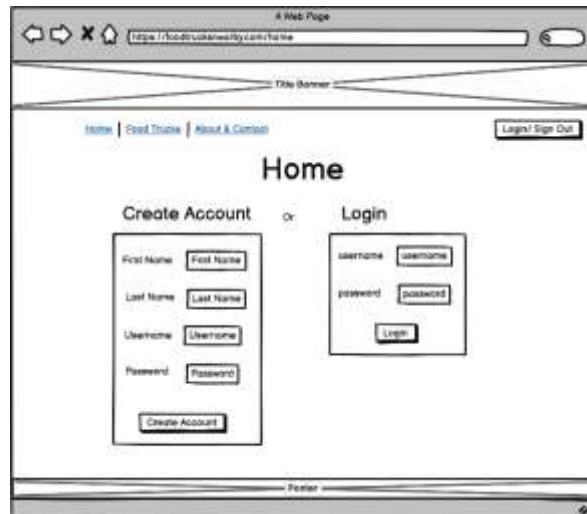

She selects Food Trucks from the navigation bar and is greeted by the page. After selecting her new city in the dropdown, a list of food trucks nearby populates.

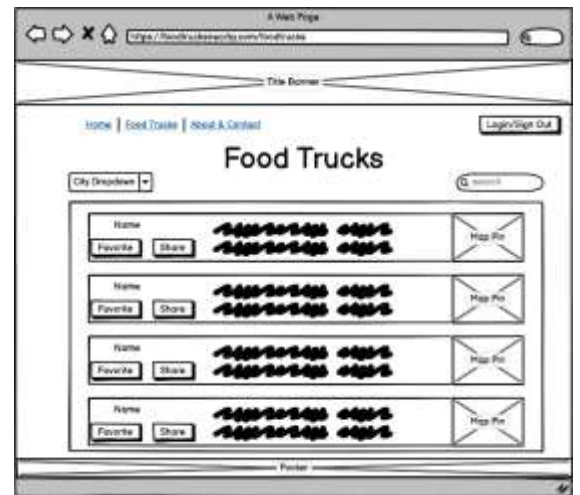

After browsing food trucks, she sees some she wants to try and wishes to save them for later access. Nancy clicks on the Login/Sign Out button.
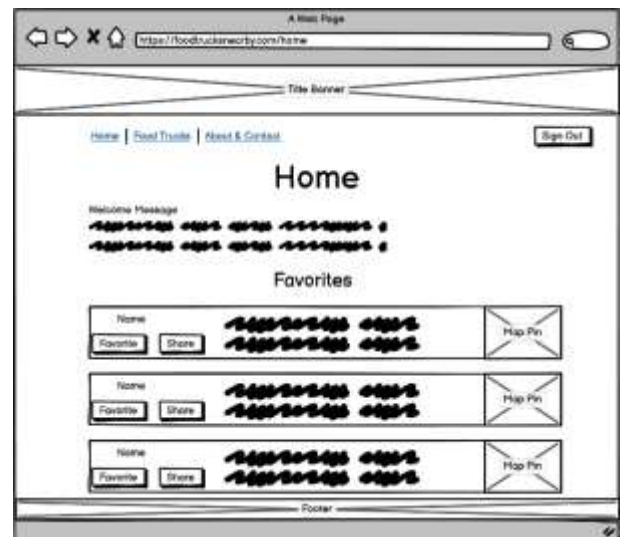

After clicking the button Nancy is greeted by the login/create account screen. After entering the relevant she creates her account.

With an account made she returns to the list of food trucks and favorites the ones she is interested in.

The next week she decides to try one of the food trucks she saved. When she access the home screen with an account she is greeted by her favorites at the bottom of the screen. She quickly checks which ones are open and where to visit.
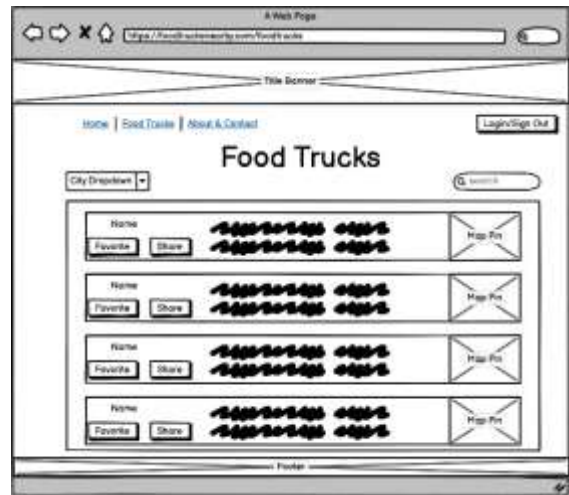

Travel Terry is visiting his son at college. In LA the food truck scene is everywhere and so he decides to see what the town has to offer.
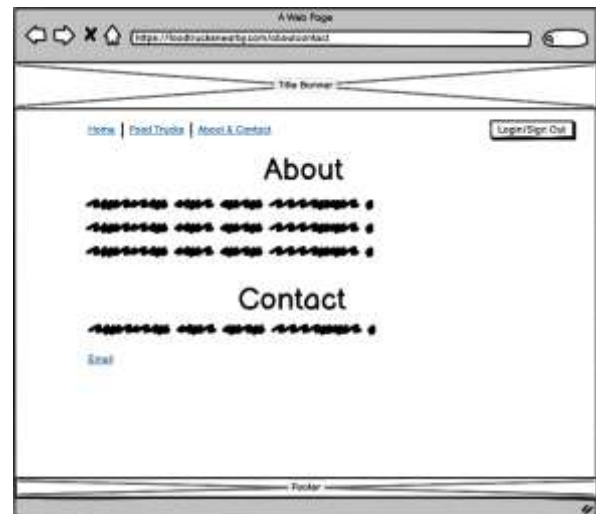

Terry accesses the list of food trucks using the navigation bar and changes his city from LA to Ames. The list repopulates with food trucks nearby.

Terry decides he is interested in getting some cheesesteaks, so he uses the search option to filter food trucks based on if they have cheesesteaks. After selecting one he clicks on the corresponding map pin. Not knowing the layout of Ames, the map pin routes to Google maps and provides directions after his current location is added.

Terry shares the food truck with his son to meet there.

Terry wants to tell the admin how much time the application saves him from searching around. He selects "About & Contact" from the navigation bar and uses the provided contact information.
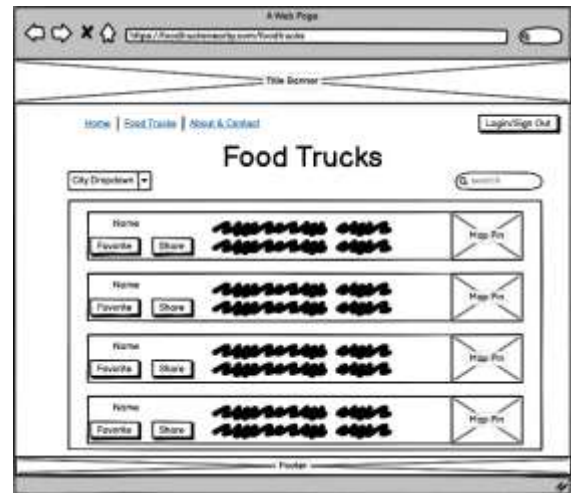

Professional Paula saw a new food truck on the way to work that she did not recognize. She first visits the home page of the application.

Paula did not catch the name of the truck but knows it starts with A and looked like a taco truck.

She uses the search function to look for trucks that serve tacos or have names that start with the letter A. None of the results look like the one.

After asking around she finds the name and Facebook page of the new truck. She decides to contact the admin and send the new information to ensure the application is updated.

She also has feedback suggesting the ability to sort trucks based on date added for faster searching of new trucks to the area. She also has some notes about the accessibility and other features. Paula uses the contact information to send a lengthy email to the admin.
